PORTABLE REAR AXLE ALIGNER CART

21130

Bee Line announces the release of the new 21130 Portable Rear Axle Aligner Cart. This mobile cart safely stores every piece of the 21000 Rear Axle Aligner including the laser recharging unit and two optional FPT 8000 Floor Plates. The compact design allows shops to spare valuable space while keeping their equipment away from any danger of being damaged. When an alignment is required, simply grab the handles and roll it to wherever it is needed. Each piece of equipment can be easily removed and returned before and after the alignment. The 21130 is a time and money saver for any shop that performs Rear Axle Alignments with our 21000 Portable Rear Axle Aligner.
