

# POWER CONVERTERS

## 1140 SERIES

The 1140 Series Power Converters will run your laser at 13VDC with 90 to 260 VAC.

The 1140 senses what voltage it is hooked up to and automatically runs the laser on that voltage.

The 1140 is the only class 2 UL listed power converter rated for outdoor use in the laser industry.

The 1140 converter is compact and tough, and should give you years of trouble-free operation.

### FEATURES

**Overvoltage protection**

**Short circuit protection**

**Runs laser from 90 to 260 VAC**

**Compact: 2 1/4 x 3 x 6 1/4"**

**UL listed for  
Outdoor Construction**
