

Roll-Off Camera System

Because you can't always be sure that refuse is the only thing that might be an obstacle in your path, ASA is proud to offer the Voyager® Roll-Off Camera System. This system's high resolution, heavy duty monitor, when paired with up to three Voyager® cameras, provides drivers with a clear view of images directly behind or to the side of Roll-Off trucks and beyond the normal scope of vision provided by mirrors. Whether the Voyager® Roll-Off Camera System prevents personal injury or costly property/vehicle damage – a single prevented accident will provide a quick ROI and increase productivity for any fleet. Increase your road visibility, avoid potential blind-spot accidents, and enhance overall safety with the exclusive Voyager® Roll-Off Camera System.

LCD MONITOR

Features Include: 7" Heavy Duty color LCD monitor, built-in speaker, 12V triggers, 16:9 widescreen format, slim-line profile, NTSC/PAL compatible, backlit color/contrast brightness controls (for nighttime use), weather resistant housing, flexible mounting options.

Voyager® AOM703 - three camera inputs

PROTECTED BULLET CAMERA

Camera makes it more efficient for drivers to quickly and accurately load and unload roll-off containers.
