

RS Series

Roadside School Signals

American Signal Company brings you the RS Series Road Side School Signal that features 6 3/8" diameter amber flashing beacons, and an incandescent Portland Orange illuminated MPH center section.

The RS Series school signal beacons and center section include rear compartments into which the optional flasher and or time clock may be installed. This allows use of the signals without an accompanying control cabinet.

The RS Series incandescent center section includes a polycarbonate lens with customer specified MPH message.

The RS Series school signal is available with a choice of standard sign blank sizes featuring a white reflective sheeting background with a yellow reflective sheeting "SCHOOL" stripe. Various School Speed Limit text messages are available on the sign blanks. Consult the factory.
