

ANNOUNCEMENT *Voyager*

NEW PRODUCT

IT'S A CAR, IT'S A BIKE...

IT'S SUPER VISIBILITY!

KEY FEATURES

- 12VDC Power System
- High Performance Color Optics
- Waterproof (IPX7 rated)
- NTSC Video Output Signal Format
- Sensitivity: 0 Lux
- Mirror (reversed) Image Orientation
- 102° Horizontal Viewing Angle
- Machined Aluminum Body
- Impact Resistant Plastic Housing
- Excellent Low Light and High Bright Environment Performance
- IR LED Assisted Illumination
- Dimensions:
1.68" W x 2.19" H x 3.31"D

Have no driving fear.

The all-new Voyager® Super CMOS Side Body Observation Cameras are here to save you from dangerous vehicle blind spots!

The Voyager® Super CMOS Side Body Cameras are designed to offer maximum **SAFETY** and **VISIBILITY** while out on the road. When paired with one of our Voyager® observation monitors, these high performance cameras deliver 'real time' images that aid drivers in changing lanes, merging, and making wide turns. They also allow drivers the ability to see beyond the normal scope of vision provided by conventional mirrors.

What's unique about these Voyager® cameras is that they utilize innovative **CMOS TECHNOLOGY**. Using CMOS technology has allowed us to significantly miniaturize the cameras, making them even more aerodynamic, unobtrusive, and aesthetically appealing for all mobile applications.

The Super CMOS Cameras also offer **HUGE** advantages in picture quality. They are "anti-blooming",

which means the halos and bright areas that can appear around images are eliminated, thus making the Super CMOS cameras more effective in high bright (daytime) and low light (nighttime) environments! Housed in impact resistant plastic housings, the Voyager® Super CMOS Side Body Cameras are ideal for all exterior installations.

Be a hero. Save the day. Rescue your drivers from dangerous blind spots and tricky driving situations. Check out the Voyager® Super CMOS Side Body Cameras today!

EXPAND your vision
