The **MNS-500** allows for crowd control entities and law enforcement agencies to setup advisory posts in any location to communicate with crowds during large events and emergencies.

With four powerful 400 watt neo-planar speakers, the mass notification trailer, placed in strategic areas, can reach thousands of people within a range of up to a ½ mile. This device is designed to quickly instruct people during a crisis for possible evacuation or relocation in an orderly and safe manner. Battery powered and solar charged, the unit can be quickly and easily deployed in any environment without the need for permanent power.

SPEAKER COVERAGE

- Broadcasts highly intelligible and directional live messages and emergency instructions to people over large areas
- Can Broadcast with clarity up to 1,200 feet with 360° Degree Coverage
- Speaker Coverage surrounds masses w/ alerts that can be understood and acted upon
