

Martime Products

Marine Barrier Mat

SaveSorb's Marine Barrier Mats were specially designed in conjunction with Los Angeles Beaches and Harbors to absorb oil and fuel spills on water. At 6' x 24", these floating mats can be used inside of a contained spill area or can be linked together to form an absorbent barrier. The Mats are made with durable and highly visible yellow material for easy visibility.

Marine Barrier Mat

Marine Boom Wrap & Skirt

Designed to convert existing booms into absorbent booms. These super absorbent mats wrap securely around a boom to absorb contained spills. Attached Skirts increase absorption and minimize escape. Because they don't leach, products can be dried and used more than once.

Marine Boom Wrap & Skirt

Marine Containment Socks

Bilge Sock

Marine Containment Socks

At 8' long and 6" wide, these containment socks can be linked together to form a containment barrier of any size. Used to contain spills from leaking boats, docks or shore releases, Containment Socks are easy to deploy and remove.

Bilge Sock

SaveSorb Bilge Socks are designed to fit inside most engine containment areas to keep your bilge clean and to prevent oily water from exiting into the environment. At 3" wide and 18" long, the special SaveSorb Spillover design provides superb absorption in a slim profile.

All-Natural Absorbent

Loose Fill Products

X-Large Compressed Bag

At 3.8cf compressed and 7cf expanded, it is ideal for larger spills or can be emptied into a 50 gal. drum for repeated use in shops or garages.

Absorbs Approx. 40g

Large Compressed Bag

At less than 0.6cf compressed (1cf expanded), it's portable enough to move around with ease yet can handle most large spills.

Absorbs Approx. 9g

Medium Resealable Bag

Ideal for use around the shop where small spills occur regularly. The Medium bag holds approximately 4cf of product in a resealable bag.

Absorbs Approx. 3g

Small Compressed Bag

Ideal where space is tight. Packed in a 6"x17" bag, the small bag expands to nearly 0.4cf; enough to deal with your average accident.

Absorbs Approx. 3g

High Wind Mix

Designed for those areas where wind is a constant factor, the high wind mix is heavier and more stable in windy environments.

Absorbs Approx. 7g

Other Products

Stormwater Wattle

SaveSorb's Stormwater Wattle is specifically designed to prevent unwanted oils and chemicals from entering storm drains while allowing clean water to filter through. The wattles can also be used as an effective outside containment berm in areas where spills or leaks occur. Wattles come in customizable lengths and can be made as large as 18" in diameter. For outside permanent use, they can be made with biodegradable fabric allowing integration into the local environment. Shown here with optional Stormwater Drain Cover.

Stormwater Wattle

Generator Room Mat

SaveSorb mats can replace clay and messy absorbent pads to keep your generator rooms clean for weeks or months before needing replacement.
