# LIGHT-DUTY MIRRORS

## CUSTOM-FIT FOR WORK OR PLAY

RETRAC light-duty mirror heads and mirror assemblies are designed to offer a vehicle-specific fit and are the perfect match for the OE mirrors on light-duty trucks. These mirrors range in size and style and are designed to mimic the look of the existing mirror on each application. Many of our light-duty mirrors are made with first-surface glass to eliminate dangerous glare, and many are available with a range of features, including telescoping mounts, motorized glass, heated glass and a retractable design.

## KEY BENEFITS

### | Motorized

The built-in motor available on some light-duty mirrors has a four-way actuator to find the precise angle for a clear view.

### | Telescoping

Some light-duty mirrors come with a telescoping mount to expand the field of vision for increased visibility, particularly with larger trailers.

### | Custom fit

Each custom light-duty mirror is designed for a specific vehicle application, making it a perfect replacement option for OE mirrors.

**RETRAC**<sup>™</sup>  
MIRRORS

Over the past 60 years, RETRAC has grown to become an industry leader and recognized name for quality mirrors and front-end protection.

Our company was established in 1958 by Al and Frank Hager, two farmers from Harvey, North Dakota. Their patented idea for a retractable mirror originated from damaged mirrors on farm equipment. The pair moved to Minneapolis, Minnesota and began manufacturing truck mirrors with this new, patented design.

Since then, our company has expanded from that single product to what is currently the most complete line of truck mirrors in America. Over the years, we have added more aftermarket and OEM coverage, enhanced components like our built-in Smart heater and a complete line of heavy-duty grille guards.

Today, the RETRAC name is known for quality and a broad product line. Underlying everything we stand for and offer is one simple guiding principle: the customer is KING and our associates are our greatest ASSET.
