

MODEL 9800 HS

LIGHTING FOR HIGH SPEED SNOW PLOWS

SUPERIOR VISIBILITY AT HIGH SPEEDS.

The Model 9800 HS snow plow headlights are now available at your authorized J.W. Speaker dealer.

J.W. SPEAKER
Engineered. Lighting. Solutions.

HIGH PERFORMANCE AT HIGH SPEEDS

The **NEW Model 9800 HS** snow plow headlight from J.W. Speaker uses new SmartHeat™ technology to automatically keep headlights free of snow and ice, even while traveling at high speeds. The 9800 HS provides clear headlights so drivers can see the road ahead with less stress and eye strain. Bright, white LEDs cut through darkness, fog and severe weather all year round, making plows more noticeable to other drivers.

Advanced SmartHeat for High Speeds

The upgraded lens and SmartHeat system from the standard 9800 is designed to withstand the brutal conditions of high speed plowing. The added heating elements and edge-to-edge lens design helps prevent ice bridging on the lens when plowing at high speeds. Upgrade to the Model 9800 HS to keep roads and highways safe, and traffic moving.

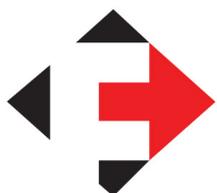

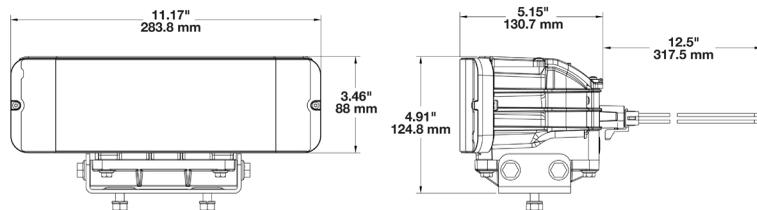

Model 9800 HS

LED High & Low Beam Headlight; 12-24V DC Input

- SmartHeat™ heated lens technology designed for highway and high speed plowing
- Advanced lens & heater design to help prevent ice bridging
- Uses less power than conventional halogen headlights
- High & low beam headlight with amber turn signal
- Low 5" profile design increases driver's line of sight
- UV-resistant polycarbonate lens and Xenoy™ housing prevents rust and corrosion
- Fully DOT-compliant; No EMI interference; Sealed to IP67

Part No.	Description
0555743	Kit of 2 Heated 12-24V LED Headlights
