

MODEL 234 HEATED LED TAIL LIGHTS

LIGHTWEIGHT. EXTREME DUTY. ALL YEAR ROUND.

Snow and ice won't stop this tail light.

J.W. Speaker's Model 234 are the industry's first LED tail lights that de-ice lenses, enabling year-round use while providing superior visibility, extreme durability and unmatched longevity. Lightweight yet rugged, they are capable of withstanding 10 g's worth of vibration. The Model 234s are drop-in replacements for 4" round tail lights commonly used in a wide range of applications.

Designed and tested to perform day or night, all year round.

Left: Clear Heated Reverse Light. Center: Red Heated Stop/Tail/Turn Light. Right: Amber Heated Turn Signal

J.W. SPEAKER®
Engineered. Lighting. Solutions.

MODEL 234

DROP-IN REPLACEMENT

FOR 4" ROUND TAIL LIGHTS

Model 234 heated tail lights are available in three configurations: Red Stop/Tail/Turn, Amber Turn and Clear Reverse. Each light is available with or without a wiring harness. Available accessories include a rubber mounting grommet, plastic mounting flange and 2 different trim rings to facilitate installation into different types of vehicles.

Features include:

- Smart heating system automatically de-ices lens
- DOT-compliant with 12-24V DC operating voltage
- Sealed to IP69K for power wash & steam cleaning resistance
- Low power consumption, using only 8W of power to de-ice
- Superior condensation management

Model 234 LED Heated Tail Lights

12-24V DC system operates in 9-32V DC. Sold as single lights.
