

MULTI-GRIP TIRE HANDLER

GET A GRIP AND ADD EFFICIENCY TO YOUR OPERATION

GVM's Multi-Grip Tire Handler was designed to allow users to change tires on application units, quickly, safely, and efficiently. The tire handler is able to lift and maneuver tire and wheel assemblies weighing up to 2,000 pounds, and from 56 to 80 inches in diameter. Its mounting plate allows the Multi-Grip Tire Handler to easily attach to any skid steer or front end loader with a universal mounting plate.

The Multi-Grip Tire Handler features a hydraulically operated gripping jaw, allowing it to easily center on the tire with a firm grip. The grabbing assembly swivels approximately 60 degrees, allowing users to easily align the wheel with the studs or the wheel bolt holes on the hub. The front end loader's movement allows users to pick tires up from a flat position on the ground and rotate them to a vertical position to attach to the application unit.

- Up to 2,000 lb capacity rating
- 56 in. closing range
- 80 in. opening range
- 60° swivel range
- Universal mounting plate attachment
- Fits tire sizes from 380/85R34 to 710/70R42
- Expanded metal grip plates provide on clamping arms provide a tight grip
- Adjustable legs allow the unit to sit on its own without additional support
