Voyager®

Digital Wireless Camera System

FEATURING

Auto-Pairing

Adding camera systems to your fleet is easy. Our new **Auto-Pairing system** can seamlessly pair *your* wireless Voyager® monitor to *any* wired Voyager® camera on *any* trailer. Pairing is achieved by pressing one button, simplifying connections and eliminating bulkhead wiring.

WVOM713AP
7" LCD color monitor
• Camera connects to 12V DC power source
• Signal transmits through and around objects up to 60 feet away
• Three camera inputs (one wireless, two wired)

EXPAND your vision™

CVRPS14
REAR SENSOR SYSTEM

VISUAL/AUDIBLE ALERTS

When attached to a compatible monitor, this sensor gives both an audible and visual notification when it detects an object within range. The audible warning progressively beeps as objects approach the vehicle.

SIGNAL WARNING ZONES

Showing three color warning zones, red, yellow and green, the sensor will alert the driver if an object is within a 9 foot proximity of the vehicle. Each color will represent 3 feet of space to give the driver depth of vision.
BACKUP SENSORS

This package includes four sensors that space evenly along the back of the vehicle to provide an accurate reading of the surrounding areas along with range of vision on the front monitor.

SELECTABLE
GRAPHICS & TONES

With a compatible Voyager® monitor or JENSEN® stereo attached, drivers can select their preferred tone and screen graphics.

DESIGNED FOR
COMMERCIAL VEHICLE ENVIRONMENTS

COMPATIBLE WITH:

VOYAGER® MONITORS

JENSEN® TOUCH SCREEN STEREOS*

*Must have camera input
