J.W. SPEAKER BRINGS
SCIENCE & DESIGN TOGETHER.

We view vehicle lighting from the perspective that matters most — Yours. Our engineers advance the science of light further each day to improve your safety. Our designers make vehicles look more beautiful from every point of view. You only get this unique mix of **science & design** from authentic J.W. Speaker products.

1 TS4000

Over 133,000 candela of light in just a 7" round housing. Designed to perform off-road with durable solid optics and rugged die-cast aluminum housing.

2 MODEL 4415

Light up dark areas around your truck with this side view mirror kit. These 2 pre-assembled spotlights block light from the driver's eyes, providing maximum visibility rearward without blocking sight lines.

3 MODEL 234 STOP, TURN, & TAIL

Increase visibility to other drivers on the road with tail lights clear of snow & ice. Heated drop-in replacements for 4" round halogen tail lights commonly used in heavy-duty trucks.

4 HEADLIGHTS

Enhance light output and reduce glare with state-of-the-art LED headlights.

5 TS3001R & TS3001V

Shock and vibration resistant housing with powerful LEDs for premium performance. This 6" round and 7" x 5" oval light has a compact design for greater mounting flexibility.

6 MODEL 95 FOG LIGHT

90mm high beam or fog beam LED lights designed to be used with stock headlights on heavy trucks or buses, and use 75-80% less power than stock halogen lights.

Fits Peterbilt 579/587 and Kenworth T680 Models

POD LIGHT

Introducing the J.W. Speaker Peterbilt POD Light! The drop-in replacement for stock headlamps for the Peterbilt 389 & 567 trucks with Plug & Play functionality.

The LED POD Light features SmartHeat™ technology option, keeping the lens free of ice and snow, a built in Bi-Led digital switching for High and Low Beams, DRL and built in turn-signal optics with a military grade lens for anti-fog and UV protection.

Delivering superior visibility, durability and longevity the J.W. Speaker POD Light produces an exceptional punch of light down the road and gives ditch-to-ditch lighting coverage. Happy drivers are loyal drivers, build dealership allegiance by providing the best lights on the market for the best trucks on the road.

DRL, Front Position, and Turn Signal Optics use a unique "blade" design.

DOT compliant reflex optic and front side marker with feature lines.

The Bi-LED module allows for digital switching for the high & low beam optic, removing failure point of a mechanical system.

High and low beam delivers an exceptional punch and spread on the road.

1 Model 832

This 4" x 4" light features a UV-resistant polycarbonate lens and rugged die-cast aluminum housing which stands up to the rigors of everything from industrial job sites to off-roading.

2 MODEL 4415

Light up dark areas around your truck with this side view mirror kit. These 2 pre-assembled spotlights block light from the driver's eyes, providing maximum visibility rearward without blocking sight lines.

3 MODEL 234 STOP, TURN, & TAIL

Increase visibility to other drivers on the road with tail lights clear of snow & ice. Heated drop-in replacements for 4" round halogen tail lights commonly used in heavy-duty trucks.

4 MODEL 8910 EVOLUTION 2

SmartHeat technology & Dual Burn high beams combine into one powerful 5" x 7" high and low beam LED headlight. An easy replacement for buckets typically used in heavy duty trucks.

5 Model 526

Die-cast aluminum housing with versatile mounting bracket to install anywhere on your vehicle. Over 5,500 Effective Lumens of bright light in just a 6" x 6" square.

6 MODEL 793

With superior intensity and light quality from a small package, the Model 793 can increase public safety, helping employees and pedestrians feel safe & comfortable. Amber, blue, or red LED versions available for a custom lighting system for any application or environment.

7 Model 778 XD

Designed specifically for use with backup cameras and meets regulation SAE J593 to emit no more than 300 candelas in an even spread of light. Compact housing with universal mount to easily install.

SMARTHEAT®

DON'T LET SNOW AND ICE SLOW YOU DOWN.

Winter weather can cause snow and ice build up on the outside of lights, reducing visibility. This creates a dangerous situation not only for you, but to others as well.

J.W. Speaker's series of heated LED lights with SmartHeat® is redefining lighting with its integrated lens heater technology. Each light is designed to automatically de-ice the surface of the lens. Products with SmartHeat provide peace of mind during cold and snowy conditions by maintaining your ability to see, and to be seen by other drivers.

SmartHeat Technology uses an internal sensor for air and light temperature and automatically turns the heater on and off as needed.

		Light Temperature		
				
Air Temperature		ON	ON	OFF
		ON	OFF	OFF
		OFF	OFF	OFF

1 Model 407 STROBE LIGHTS

With a light weight design, updated mounting pattern and less than 4" in overall height, these LED strobe lights provide an easy to use, emergency strobe light, fitting your compact spaces.

2 MODEL 9049-3M LIGHT BAR

This is the very first light bar that is legal for use on-road and will not blind oncoming traffic when mounted. The Model 9049-3M spot light combines both spot and driving beams, using high performance optics for a bright, white light.

3 MODEL 9900 LP HEADLIGHTS

A compact, high-powered all-in-one high beam low beam, & turn signal LED headlight that is ideal for small and medium sized snow removal equipment. Heated lens to melt snow and ice, with sloped lens designed to prevent ice build up. DOT-compliant for on-road use.

4 MODEL 6146 FOG LIGHTS

LED fog lights to fit bumpers with stock mounting configurations. No anti-flicker harness required and SAE, ECE, and Transport Canada compliant for on-road use.

Exclusive to F150 trucks.

5 MODEL 793

With superior intensity and light quality from a small package, the Model 793 can increase public safety, helping employees and pedestrians feel safe & comfortable. Amber, blue, or red LED versions available for a custom lighting system for any application or environment.

1 Model 411 INTERIOR LIGHTS

The Model 411 comes in two varieties: a 2-wire switch version with on and off functions, and a 3-wire switch version with on, off, and temporary/door functions.

2 MODEL 8800 EVOLUTION 2

Upgrade your 4" x 6" lights to powerful LED headlights with lenses that automatically melt snow and ice to keep lights clear. A rugged light complete with aluminum housing and added protection from salt spray.

3 MODEL 793

With superior intensity and light quality from a small package, the Model 793 can increase public safety, helping employees and pedestrians feel safe & comfortable. Amber, blue, or red LED versions available for a custom lighting system for any application or environment.

4 MODEL 234 STOP, TURN, & TAIL

Increase visibility to other drivers on the road with tail lights clear of snow & ice. Heated drop-in replacements for 4" round halogen tail lights commonly used in heavy-duty trucks.

1 Model 407

With a light weight design, updated mounting pattern and less than 4" in overall height, these LED strobe lights provide an easy to use, emergency strobe light, fitting your compact spaces.

2 Model 8730

Easy plug-and-play wiring and fit perfectly in the OEM housing for Mack trucks and Thomas Built buses (PAR56). The Model 8730 Shallow 7" round LED Headlight will effectively light your way during the night and enable safe driving.

3 MODEL 274 & 274 FLASH

Your brake, turn, and hazard lights are critical visual signals to drivers on the road. The Model 274 has 6 different versions so you can add SmartHeat® technology to every side of your vehicle.

Model 274 Flash available in blue, green, red, amber, & white.

4 MODEL 670 XD

Compact heated work light with amber and white LED options available. A universal mount so you can easily install exactly where you need it, without worrying about the lens icing over.

5 Model 234 STOP, TURN, & TAIL

Increase visibility to other drivers on the road with tail lights clear of snow & ice. Heated drop-in replacements for 4" round halogen tail lights commonly used in heavy-duty trucks.

6 MODEL 777 ARC LIGHT

The Model 777 offers a unique "keep out zone" safety light in a sleek and practical design. They are available in three different color configurations to create the best solution for each industry and application.

1 Model 407

With a light weight design, updated mounting pattern and less than 4" in overall height, these LED strobe lights provide an easy to use, emergency strobe light, fitting your compact spaces.

2 MODEL 274 & 274 FLASH

Your brake, turn, and hazard lights are critical visual signals to drivers on the road. The Model 274 has 6 different versions so you can add SmartHeat® technology to every side of your vehicle.

Model 274 Flash available in blue, green, red, amber, & white.

3 MODEL 8800 EVOLUTION 2

Upgrade your 4" x 6" lights to powerful LED headlights with lenses that automatically melt snow and ice to keep lights clear. A rugged light complete with aluminum housing and added protection from salt spray.

4 Model 234 STOP, TURN, & TAIL

Increase visibility to other drivers on the road with tail lights clear of snow & ice. Heated drop-in replacements for 4" round halogen tail lights commonly used in heavy-duty trucks.

5 MODEL 8700 EVO 2 DUAL BURN

Easy plug & play upgrade for 7" round LED headlights. SmartHeat technology keeps the lens clear all year long, while Dual Burn® high beams gives you an extra punch of light down the road.

AL QUIRING

FROM HIGHWAY THRU HELL

The best lights for the worst conditions. Al Quiring has made a name for himself as a Heavy Rescue operator on Canada's infamous Coquihalla Highway. Featured on the TV show "Highway Thru Hell," Al works in the worst winter conditions proven to be too dangerous for others. He needs to see where he's going, and because he's often inches from traffic, he needs to be certain others can see him.

For that reason, Al has outfitted his fleet with SmartHeat® lighting from J.W. Speaker. "After 30 years of driving, I can actually see the road at night. They make me feel a whole lot safer. I believe those lights help me operate safely and efficiently in really challenging working conditions."

GET HOME SAFELY

ADDITIONAL TRANSPORT LIGHTS

Model 93

Compact and powerful 90mm on-road legal headlights available in low beam or high beam versions. Versatile bracket to mount anywhere you need it.

Model 8630 EVOLUTION

5.75" round (PAR46) high and low beam headlights with Delphi connectors. Designed to replace sealed beam lights and provide superior visibility and unmatched longevity.

Model 8900 EVOLUTION 2

A powerful 5" x 7" high and low beam LED headlight that is an easy replacement for buckets typically used in heavy duty trucks.

Model 97

Designed to be drop-in high & low beam LED headlight replacements for 100mm lights, with 3-point or pedestal mount options available. Heavy-duty aluminum housing, UV-resistant lens, and the latest in solid-state optic technology.

Model 8730 SHALLOW 7"

Easy plug-and-play wiring and fit perfectly in the OEM housing for Mack trucks and Thomas Built buses (PAR56). The Model 8730 Shallow 7" round LED Headlight will effectively light your way during the night and enable safe driving.

Model 9800

The 5" x 11" Model 9800 provides a universal, multi-function headlight ideal for heavy-duty municipal trucks clearing snow on county roads and in residential areas.

Model 526

This 6" x 6" square light is available in our traditional flood, trapezoid, and spot beam patterns, as well as an innovative new Anti-Glare beam pattern.

Model 8801 EVOLUTION

Model 8801 provides superior visibility, extreme durability, and unmatched longevity for 1A1 and 2A1 sealed beam replacement. Pedestal mount included for added flexibility.

Model 9800 HS

The 5" x 11" Model 9800 HS snow plow headlight from J.W. Speaker uses new SmartHeat® technology to automatically keep headlights free of snow and ice, even while traveling at high speeds.

Family owned and operated since 1935. We proudly design and engineer the best LED lighting products, all in Germantown, WI, U.S.A.
